

# **Systemic Review of Mufradat Learning Strategies**

Keywords: Arabic Language, Learning Method, Learning Strategy, Mufradat

Mufradat or the vocabulary of each language is part of the most critical element because the ability to speak a foreign language for each person is measured by the vocabulary he has. In reality, learning vocabulary such as Arabic is faced with serious problems.

Data is taken from these sources by carefully reading each source and then taking its meaning according to the research content.

The results of the analysis

of the data found some mufradat learning strategies, some of these strategies are singing, translation, consolidation, and metacognitive. Learning strategies can impact students' knowledge in mufradat measured by the teacher's ability to use strategies, and alignment between methods, media, and forms of evaluation with mufradat learning objectives.
